

Basil Ali Alqahtani

Electrical Engineer, PMP®

b.alqadh3an@gmail.com · linkedin.com/in/basialqahtani · Riyadh, Saudi Arabia · mobile across the Kingdom incl. the Eastern Province

Site Electrical Engineer on the PIF Azm Program, a national development program placing Saudi engineers on Vision 2030 giga-projects, deployed to the Qiddiya Speed Park Track (FIA Grade 1, future home of the Formula 1 Saudi Arabian Grand Prix) with El Seif Engineering Contracting, a PIF portfolio company. PMP® certified — Above Target, first attempt. BSc Electrical Engineering honours graduate, King Khalid University, 4.42/5.00 GPA.

EXPERIENCE

Site Electrical Engineer — Azm Program

Public Investment Fund (PIF) · April 2026 – Present · Riyadh

Qiddiya Speed Park Track, on site with El Seif Engineering Contracting, a PIF portfolio company

Selected for the PIF Azm Program, a national development program placing Saudi engineers on Vision 2030 giga-projects.

- Work across medium and high voltage electrical systems, distribution infrastructure and substations, backed by formal MV/HV training.
- Support project controls: schedule tracking, progress monitoring against planned milestones, and variance reporting to project management.
- Deliver quality control and assurance through WIR and ITP procedures, with NCR root-cause analysis to prevent recurrence.
- Review material submittals and shop drawings against project specifications, Saudi Building Code and IEC standards.
- Coordinate MEP interfaces across electrical, civil and mechanical disciplines to protect construction sequence and mitigate delivery risk.
- Enforce HSE compliance and site governance in line with OSHA and IOSH practice.
- Apply cost monitoring, contract management and procurement principles from the Level 4 NVQ to live site works.

Electrical Engineering Intern

Saudi Energy Company (formerly Saudi Electricity Company) · June – August 2024

Distribution and Automation Group, Asir Region

- Supported a Vision 2030 distribution automation project targeting a 50% reduction in alarm response time and 20% higher operational efficiency.
- Conducted Factory Acceptance Tests (FAT) on LBS, SRMU and SMRMU distribution switchgear, verifying performance against specification before field deployment.
- Worked the ASIR-CR distribution control centre, monitoring live network status, interpreting fault data and reporting on system performance.
- Diagnosed and resolved faults across the medium voltage network: reclosers, transformers and voltage regulators.
- Conducted load flow, protection coordination and reliability studies; supported testing and commissioning of HV transformers and circuit breakers.
- Performed preventive maintenance testing and prepared technical documentation and compliance reports.

President, IEEE Student Branch

King Khalid University · August 2023 – March 2025

Elected President after serving as Vice President.

- Inherited a branch running on zero budget and rebuilt it into 40+ events reaching 1,400+ participants.
- Built industry and academic partnerships from nothing to secure speakers, content and funding.
- Led the organising team across planning, sponsorship, procurement, logistics and execution.
- Managed event budgets and post-event reporting across the branch calendar.

Partner & Co-Owner — Wasom Almoheet Co.

Family enterprise, Saudi Arabia

Real estate, sub-contracting (heavy equipment & fleet), transport, hospitality — held alongside a full-time engineering degree.

- Contributed to establishing an in-house maintenance workshop with direct OEM parts sourcing, replacing outsourced servicing with internal capability.
- Managed procurement and vendor engagement end-to-end: issuing RFQs, benchmarking quotations against scope, negotiating rates, and managing supplier performance.

- Managed budgeting, cost control, resource allocation and preventive-maintenance planning across operations.
- Oversaw on-site activity, tracking progress against agreed timelines and cost expectations through to handover.

McKinsey & Company — Alumni Programs

- McKinsey Forward Program, Oct–Dec 2025: structured, hypothesis-driven problem solving, MECE structuring, Pyramid Principle communication, case-based work with cross-functional, multicultural teams.
- Digital & AI Essentials for Alumni, June 2026: selected for the alumni track — generative AI and agentic AI use cases, responsible AI adoption, building a personal digital learning plan.

EDUCATION

BSc Electrical Engineering — Power, Electronics & Telecommunications

King Khalid University · 4.42/5.00 GPA, Honours · January 2026

CREDENTIALS

PMP®	Project Management Professional, PMI. Passed Above Target on the first attempt, during the Azm Programme.
SCE Accredited	Saudi Council of Engineers — verified professional profile.
Pearson Edexcel L4 NVQ (in progress)	Construction Site Supervision: cost monitoring, contract management, procurement, quality control, progress reporting.
OSHA · IOSH	Health, safety and environmental management certification.
McKinsey Forward Program	Completed 2025, selected for the Digital & AI Essentials alumni track.

PROJECTS

AI Face Recognition System — Capstone, King Khalid University

A real-time recognition pipeline built solo. PCA/Eigenfaces for identity, with live gender, age and emotion classification layered on top. Runs at roughly 30 frames per second on CPU-only hardware, served through a Flask web app.

Tech: Python, OpenCV, PCA/Eigenfaces, Flask, Real-Time Inference

SKILLS

Power Systems

Medium & High Voltage, Substations, Power Distribution, Power Transmission, Protection Coordination, Load Flow Studies, Reliability Studies, Factory Acceptance Testing, Testing & Commissioning, Preventive Maintenance, SCADA, ETAP, MATLAB

Project Controls & Delivery

Project Management (PMP®), Project Controls, Cost Monitoring, Schedule Tracking, Variance Reporting, Contract Management, Procurement, Risk Management, Construction Supervision, MEP Coordination

Compliance & Governance

Quality Control (WIR/ITP), Quality Assurance, NCR Root-Cause Analysis, Saudi Building Code, IEC Standards, HSE Management, OSHA, IOSH, Technical Documentation, Site Governance

Analytical & Digital

Structured Problem Solving, Data Analysis, Stakeholder Management, Python, OpenCV, Power BI, Generative AI

Languages

Arabic (Native), English (Full Professional)
